SUBJECT INDEX

Abrasion resistance, of pile upholstery fabrics 167
Better Business Bureau and consumer satisfaction 193
British Rail route advice, usefulness to passengers 135
British Standard, upholstered furniture fabric 61
Carboxylmethylcellulose in dietetic foods, viscosity of 269
Classification of convenience of foods 249
Consumer and business benefit in relation to recent changes in the law 109
Consumer complaints agencies, efficiency and role of 125
Consumer Council Bills 1929–1939 115
Consumer information programmes, effectiveness of 283
Consumer preference, of white fish 151
Consumer protection, consumers and business 109
Consumer research: consumer satisfaction 51; costs and benefits 52; looking at business 53; the consumer and labour 55; the disadvantaged consumer 54
Consumer satisfaction and local redress alternatives 193
Cost-benefit study in relation to a British Standard for upholstered furniture fabric 61
Cost of complaining to the consumer 125
Dietetic foods, the practical aspects of viscosity of carboxymethylcellulose in 269
Education of home economics in the United States 159
Effectiveness of consumer information programmes 283
Fast foods and convenience foods, relationship between 249
Food and marketing communication 15
Food and nutrition, knowledge of prospective teachers 263
Food preferences of school children, questionnaire design and other factors 293
Food products, consumption and sale in relation to marketing communication 15
Grocery prices, variations in relation to store organizational structure 35
Home: moulds in 311; thermal comfort in 179
Home Economics; and sex differentiation in the secondary school curriculum 347; in higher education in the United States, current trends 159; sexual stereotyping and the teaching of 341; terminology 323; the organisational structure of 323
Household heads, production time of 239
Household production: illustrations from different regions and authors 76; the socio-cultural context 72
Marketing communication, role of in consumption and sale of food products 15
Microwave heating of potatoes to inactivate enzymes prior to frozen storage 257
Moisture studies: relation to dampness perception in laundered articles 87; relation to moisture release from floor washing 97
Mould in the home: conditions for growth 314; distribution of spores 312; sensitivity of household materials 315
Nationalized industry, related to Retail Price Index 1962–1978 1
Organization Structure of Home Economics 323
Pile upholstery fabrics, construction and abrasion resistance 167
Potatoes, blanching by microwave energy 257
Prospective teacher food and nutrition knowledge 263
Retail grocery price variations 35
Retail Price Index, related to nationalized industry 1962–1978 1
Sexual stereotyping: definitions 352; female disadvantage 356; implications for home economics 358; secondary school curriculum 347; sex role 351; teaching of home economies 341 354
Small Claims Court and consumer satisfaction 193
Store organizational structure in relation to grocery price variation 35
Terminology in the organizational structure of home economics 323
Thermal comfort in the home: minimizing costs of apparel, housing and heating 223; relation to human physiology 179; research into 185

Upholstered furniture fabric, British Standard for 61
Utility value of time in relation to household heads 239
Viscosity, of carboxymethylcellulose in dietetic foods 269
Water: domestic consumption 216; management 207; quality 214; resources 209; services 215; use in the house 217
White fish, consumer preference 151
